THERE'S A TERRAIN THAT'S JUST RIGHT FOR YOU

Depending on the type of work you do and your requirements, there's a TERRAIN that's just right for you. Discover the different models and all the features and accessories that will allow you to configure a vehicle that meets your everyday requirements and more.

DX4
DX2

TRACTION FOR EVERY OCCASION

Overcome all obstacles with the 4x4 all-terrain power of the DX4 model. But if your work doesn't call for four-wheel drive, you can always choose the 4x2 DX2 model.

OPTIONAL TYPE APPROVAL

EU T1b and T1a tractor type approvals are available (maximum speeds 60 and 40 km/h respectively).

Check out the characteristics and components of the two models. The shown vehicle is fitted with optional accessories.

LOTS OF SPACE AND STORAGE ROOM

The TERRAIN is a heavy-duty vehicle, designed to transport people and materials in comfort. Its large and surprisingly spacious cab not only keeps you safe thanks to its **anti-roll bar**, but also provides panoramic, obstacle-free visibility.

Despite its large size and sturdiness, the rear **cargo box** - which is made of steel and can handle up to 450 kg - is surprisingly agile and easily tilted. In addition, installing an **electro-hydraulic** kit will make it really easy to unload it.

ALL YOUR TOOLS, ALWAYS AT HAND

Keep your tools and documents close at hand and under lock and key with these **3 convenient compartments**, located under the seats. And if you want to have as much storage capacity as possible, you can also install a simple luggage compartment under the front bonnet. The TERRAIN also includes a new feature: two **cup holders** on the dashboard to keep your drinks conveniently at hand.

Check out the characteristics and components of the two models. The shown vehicle is fitted with optional accessories.

TOUGHNESS, DURABILITY AND AGILITY

The new TERRAIN stands out for its driver-focused design and features specifically developed to make life easier for you.

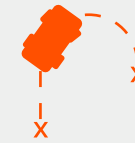

The raised and lateral position of the engine and CVT air intakes prevents dust and dirt from getting in, as well as any damage to components that might get wet in tricky situations involving fording, puddles or flooded areas.

Other highlights include the positioning of the button panel so you don't have to take your eyes off of what's important, adjustable seats and a multi-function LCD display that lets you see all the information at a glance.

INDEPENDENT SUSPENSION

Precise handling and extra firmness for your driving. Balance and stability are assured thanks to the independent suspension without an anti-roll bar.

IMPROVED TURNING RADIUS

More agile driving. The new TERRAIN reduces the turning angle and is much more agile. Now you can turn more in less space.

Check out the characteristics and components of the two models. The shown vehicle is fitted with optional accessories.

EVEN SIMPLER MAINTENANCE

Lift the front bonnet to quickly access and check the brake, coolant and windscreen wiper fluids. Streamline maintenance tasks and focus on what really matters.

ACCESSIBILITY TO ALL THE MECHANICAL COMPONENTS

Just raise the cargo box to access the engine assembly, the oil and air filters and the CVT belt. Quick and convenient access for any maintenance.

+ THE BEST *DIESEL* PERFORMANCE

A working vehicle must have an engine that's up to the job, and the TERRAIN's response is assured thanks to its **YANMAR diesel** engine.

High efficiency and low emissions with a 993 cc, 4-stroke, three-cylinder layout delivering a power output of 3600 rpm.

Robustness and strength to work efficiently and consistently on any kind of terrain.

Check out the characteristics and components of the two models.
The shown vehicle is fitted with optional accessories.

A FULL CAB FOR DEMANDING WORK

A spacious and comfortable cab is essential for all those long working days. The TERRAIN excels in this respect by offering the best performance on the market.

The **CAB** package provides a fully enclosed cab with rigid doors and a window that can be opened partially. The interior rear-view mirror, courtesy light, **ADVANCED** roof and air conditioning round off this superior comfort model.

In addition, the fact that it is so easy to get in and out of the vehicle and the absence of any obstacles between the seats, not to mention the generous opening angle of the doors, make your movements even easier.

CAB CLIMA

CAB COMFORT

The CAB CLIMA equipment is ideal for carrying out whatever task you're doing and for keeping you protected from the weather outside as you do it. Forget about rotten weather or heat and enjoy perfect temperature at any time of the year.

ACCESSORIES FOR YOUR TERRAIN

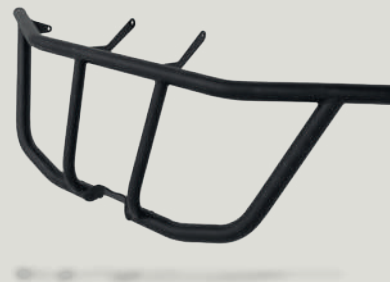

The new Original Accessories offer all sorts of possibilities to multiply the options of your TERRAIN. New solutions that adapt to your work style and impress with their design and functionality. Make the most of all the options with the newly designed load box and the possibility of installing specific applications that will help you carry out your work. Discover all the accessories at corvus-utv.com.

CORVUS SPARE PARTS & ACCESSORIES

CONTINUOUS COMMITMENT

The CORVUS AFTER-SALES service works hard to ensure that our customers receive a fast and meticulous service and a delivery response time of 24 hours. CORVUS works with top class European suppliers. As a result, in addition to supporting European industry, we also obtain shorter delivery times and greater agility in the production of components.

Using CORVUS ORIGINAL SPARE PARTS AND ACCESSORIES guarantees the performance, safety and longevity of your vehicle. Therefore, all the spare parts we offer are manufactured under the same quality premises as parts installed in new vehicles.

If you would like to receive more information about our original products, please contact your nearest distributor, or visit our website: corvus-utv.com
