AUTHENTIC OFF-ROAD DNA

The Terrain GX4s is a perfect example of a vehicle with unadulterated off-road DNA. Its powerful **570 EFI** petrol engine and its 4x4 differential lock system, provide the Terrain GX4s with unmatched power. An authentic and ideally sized all-terrain vehicle.

IDEAL COMPACT SIZE

The compact dimensions of the Terrain GX4s multiply the options for use of this UTV. Its **144.9 cm** wide allows it to develop transport tasks and services, its perfect size allows access by trails that others cannot. With a total load capacity of **440 kg**, the leader in its category.

A CARGO BOX THAT FITS THE BILL

The robust nature of the Terrain GX4s and its tilting steel cargo box make it easy to transport everything you need for your day-to-day life. This spacious rear box has a **250 kg** load capacity, making it incredibly efficient when it comes to transporting everything you need.

INCREDIBLE CAB COMFORT

The proportional dimensions of this UTV's cabin are one of its strong points. In two words, roomy and spacious. In addition, its ergonomic and intuitive driving position offers the worker a surprising level of comfort and a smooth driving experience that make for a satisfying working day.

THE MOST AGILE WORK VEHICLE

The size and qualities of the new Terrain GX4s combine to make it a nimble, easy-to-drive UTV that delivers perfect handling on all types of trails. With a ground clearance of **242 mm**, and a turning radius of **2.99 m**, the GX4s is more than able to negotiate all types of terrain.

EASY TO DRIVE AND MAINTAIN

As is the case with all the vehicles in the CORVUS family, maintaining the Terrain GX4s is an extremely simple task. To gain access to the engine assembly, the oil and air filters, and the CVT belt, all you need to do is remove the cargo box in one swift movement.
